Seogyeong Jeong

I am a Master student at KAIST School of Computing, working under the supervision of Prof. Alice Oh. My research interests lie in **Natural Language Processing(NLP)**, **Machine Learning(ML)**, and **Graph Neural Network(GNN)**. Recently, I have been focusing on (1) Evaluation of LLM to enhance its reasoning on planning (2) Evaluation of LLM on its multilinguality (3) Application of AI in the aspect of cultural understanding.

Personal Data

Place and Date of Birth:	Republic of Korea | 28 August 2000
Address:	4417, E3-1, 291 Daehak-ro, Yuseong-gu, Daejeon, Republic of Korea
Email:	sg.jeong28@kaist.ac.kr
Accounts:	X, LinkedIn, Google Scholar, Github

Education

Korea Advanced Institue of Science and Technology (KAIST) Sep 2024– Current
M.S. in *School of Computing*
Advisor: Alice Oh

Korea Advanced Institue of Science and Technology (KAIST) Feb 2019– Aug 2024
B.S. in *School of Computing*(Major) and *Mathematical Sciences*(Minor)
Electrical Engineering and *Bio and Brain engineering* (Individually designed major)

Work Experience

User and Information Lab Jun 2022–Aug 2024
Research Intern
Graph Neural Network, Natural Language Processing, Generative Language model

Emerging Nano Technology and Integrated Systems Lab. Jun 2021–Feb 2022
Research Intern
Artificial neuron array based Neuromorphic computing

Computer Skills

Basic Knowledge:	HTML, Javascript, Java, Rust, Scala
Intermediate Knowledge:	Python, C, C++

Publications

Research Projects

Jul 2023 – Jun 2024

Evaluation of reasoning on Knowledge Graph Augmented Language Models and LLMs

Created a benchmark dataset to analyze the correlation between knowledge graph retrieval and the performance of knowledge graph-augmented language models. Additionally, developed a dataset with masked key entities to evaluate reasoning ability without parametric knowledge and conducted related experiments. Paper is available at: paper

Advisor: Jiho Jin, Dongkwan Kim

Jun 2023 – Aug 2023

Inquiry into Syntactic Relations Embedded in Word Representations

Demonstrated BERT's variability in learning syntax trees across languages using a probe. Analyzed how model variations impact syntactic knowledge retention and explored the relationship between structural probes and syntax. Paper is available at: paper

Cooperated with Sunwoo Kim (undergraduates)

Sep 2023 – Dec 2024

From Pretraining Data to Language Models to Downstream Tasks: Tracking the Trails of Political Biases Leading to Unfair NLP Models

Shown that the political bias in the Korean model showed a tendency towards neutrality by using method of eng et al. using Political compass test. Cconducted experiment on Multilingual LM using 8-values test, and also on LLM. Paper is available at: Paper

Cooperated with Juhyun Oh, Kiwoong Park, Seyoung Song

Mar 2023 – May 2023

Qualcomm-KAIST Innovation Awards 2023

Participated in the Qualcomm-KAIST Innovation Award 2023, a hackathon aimed at developing a reliable machine learning model to predict the Myers-Briggs Type Indicator (MBTI) of individuals using only the questions and corresponding answers. Code and report are available on GitHub, Paper.

Cooperated with Jinseo Lee and Joohee Kim (undergraduate)

Feb 2023 – Jun 2023

Individual Research - Novel sentiment Classification

Developed a dataset based on Mood Management Theory, mapping emotions on two axes—positive/negative and aroused/relaxed—offering a more nuanced approach than traditional binary emotion detection in NLP. Code and paper are available on Github, Paper

Advisor: Jiho Jin

Sep 2023 – Dec 2024

Node prediction based Earthquake dynamic prediction Graph model

Developed a novel dynamic graph prediction model based on node prediction, unlike traditional edge-based approaches, and applied it to earthquake prediction. The code is availabe on Github.

Cooperated with Hyunmin Cho, Dongwoo Won, Seungwan Kang (undergraduates)

Activities

Teaching Assistant — Mar 2025 – Present
KAIST Computer Science Department Course <Introduction to Computer Programming>

Teaching Assistant — Aug 2024 , Jan 2025
KAIST Humanity Course <Special Lecture on World Languages and Cultures - Contemporary Japanese Culture>

Teaching Assistant — Sep 2024 – Dec 2024
KAIST Humanity Course <Japanese Conversation>

Representative — Mar 2024 – Aug 2024
KAIST Catholic Student Union Sanarae

Executive — Mar 2022 – Feb 2023
KAIST Catholic Student Union Sanarae
